PROFESSIONAL SUMMARY

Full Stack Developer with 7+ months of production experience building Django REST APIs, multi-tenant SaaS platforms, and AI-driven automation workflows (n8n, MCP). Delivered 4 production systems covering payment integration, role-based access control, Redis/Celery performance optimization, and Docker deployment. Strong cross-functional understanding of business operations from direct startup exposure. Seeking to bring proven backend architecture and automation skills to a growing engineering team.

TECHNICAL SKILLS

Languages: Python (core), JavaScript

Backend: Django, Django REST Framework (DRF), MVT/MVC Architecture, RESTful API Design

Frontend: Next.js, HTML, CSS

Databases & Caching: PostgreSQL, MySQL, Redis

DevOps & Tools: Docker, Dokploy, Git, GitHub, Postman/Apidog

Integrations: JWT Auth, RBAC, esewa/Khalti Payment Gateway, n8n Automation, MCP (Model Context Protocol), Celery, QZ Tray, Web Scraping, Web Cloning

Other: Multi-tenant SaaS Architecture, SEO Optimization, Software Testing, Debugging

PROFESSIONAL EXPERIENCE

Full Stack Developer (Python/Django) - AIOT Unitech Pvt. Ltd.

February/2026 - Present

- Delivered 4 production-grade systems within 7 months, spanning event ticketing, AI-based job management, SaaS hostel booking, and restaurant ERP domains.
- Cloned and adapted website designs to match client requirements across multiple client-facing projects.
- Monitored production servers and diagnosed/resolved deployment and server errors via **Dokploy** across all live applications.
- Onboarded 5+ paying clients onto the newly launched Restaurant Management SaaS platform (**restromandu.com**).
- Currently enhancing the Restaurant Management system's asynchronous task handling (Celery/Redis) to improve performance under load.
- Deployed and managed all applications via Docker/Dokploy on production servers, delivering full systems using exclusively free and open-source AI tooling.
- Gained cross-departmental operational knowledge (marketing, sales) through **direct exposure to startup** functions.

PROJECTS

Himalayan Frequency

Django, PostgreSQL, Redis, Celery, esewa

- Event-listening full-stack platform: integrated online payment gateway, SEO-friendly architecture, role-based access across 4 distinct dashboards, and Redis + Celery for asynchronous performance optimization.

Jobryn

Django, DRF, MCP, n8n, PostgreSQL, Redis

- AI-based job management platform: designed and maintained the backend architecture using Django REST Framework; built an MCP server integrated with a multi-agent n8n workflow to automate end-user communication; implemented role-based permissions for 3 user types on a PostgreSQL + Redis production server.

Hostel Booking System (incomplete)

Django, DRF, Next.js, PostgreSQL

- Multi-tenant SaaS booking platform (Django backend, Next.js frontend) supporting multiple hostels, with per-hostel dashboards, role-based access for different staff, and API/MCP endpoint testing.

Restaurant Management ERP

Django, PostgreSQL, QZ Tray, Redis

- End-to-end restaurant operations system: POS, order & kitchen (KOT), inventory, assets, procurement, HRMS, and financial modules with visual dashboards; integrated QZ Tray for direct KOT/receipt printing; implemented branch- and fiscal-year-based advanced reporting with configurable app settings.
- Now live in production as a SaaS product (restromandu.com) with 5+ paying clients onboarded; currently being enhanced for greater asynchronous task performance.

EDUCATION

Bachelor of Information Management (BIM)

2022 - Present (8th Semester)

Nepal Commerce Campus, Tribhuvan University | Avg. GPA: 3.6
